READ THIS TOGETHER

The Floor Went Missing

Curator Ada

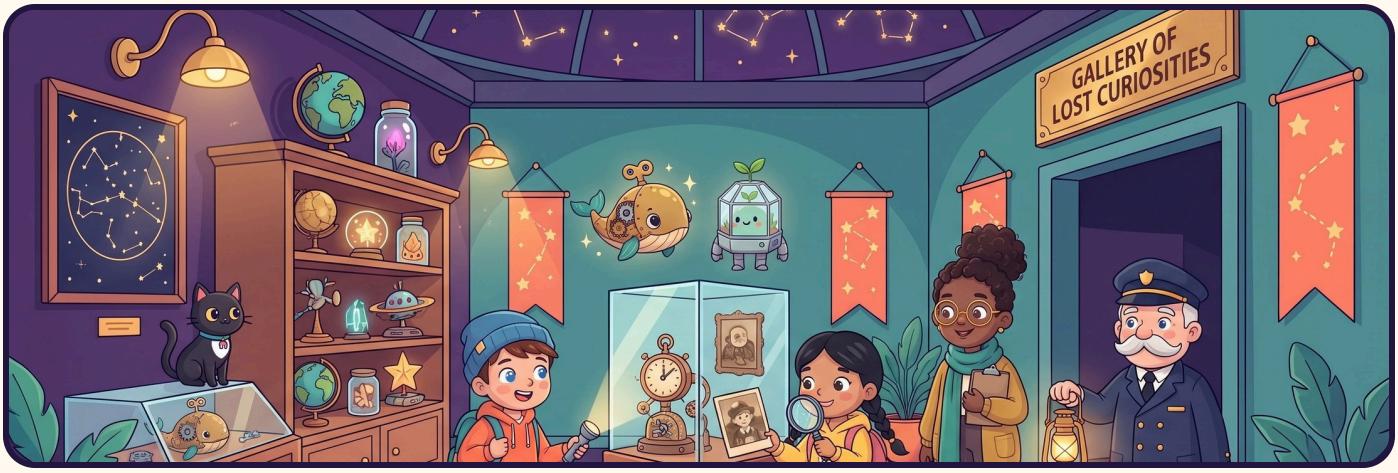

Detectives, thank goodness you're here! Tonight the **Gravity Core** hiccuped, and now everything in the museum is upside down. Teacups fly. Books flap like birds. And **Nori**, our little clockwork whale, is floating out of his pool toward the glass dome! The museum opens tomorrow at 9:30. Please help us fix it!

HOW TO PLAY

1. Your grown-up is the **Museum Keeper**. The Keeper holds the next pages and all the answers.
2. Solve each case. Write your answer, then **tell your Keeper**.
3. Correct? You get the next page! Stuck? Ask for a **hint** — hints are part of the game.

You need: this book and a pencil. No scissors needed to finish the mission.

What Moved?

Curator Ada

When gravity flipped, **two exhibits** floated off the shelf and landed in each other's spots. Here is the photo we took this morning. What is different now?

THIS MORNING'S PHOTO

THE SHELF RIGHT NOW

THE TWO EXHIBITS THAT SWAPPED PLACES

_____

Tell your Keeper **both** exhibits. Correct? You get the **Floor Plan** and the **Ceiling Notice**.

FOR THE GROWN-UP · KEEP THIS PAGE OUT OF SIGHT

Answer to Case M1: What moved?

The FERN and the GLOBE swapped places.

Hint 1: compare the two photos one exhibit at a time.
Hint 2: one of the two is green and leafy.

Did they love it?

This was one case out of eight. The full game continues the story: a safe route through the museum, four witnesses, a gravity code, a half-turn pattern, the jammed core and the master console — plus 6 bonus puzzles and a tiny golden key hidden on every page.

Every game comes with a grown-up guide (3 hints for each puzzle and every answer), an ink-saving version and a free bonus Halloween game.

14-day money-back guarantee: if it isn't the adventure you hoped for, we refund you in full.
